

Status est né sur l'ambition de rassembler **un client IM, un portefeuille numérique & un browser web3**

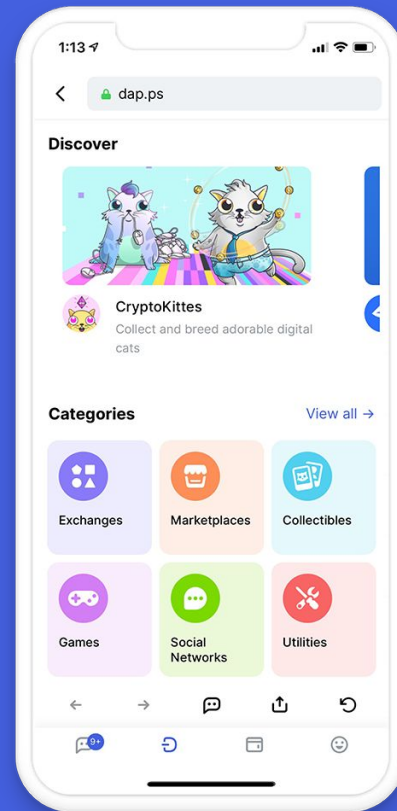

- Fondé en 2017
- <https://status.im/whitepaper.pdf>
- ICO du token SNT en juin 2017
- Beta Release en Juin 2018
- V1 en Jan 2020
- Un des projets crypto les plus actifs sur GitHub

MESSENGER

CRYPTO WALLET

WEB3 BROWSER

Mais Status a une mission plus large – C'est un écosystème de projets permettant aux individus d'effectuer des *transactions*, de *communiquer*, et de *s'organiser* de manière sécurisée, libre et souveraine

Qu'est ce que nous construisons ?

Produits

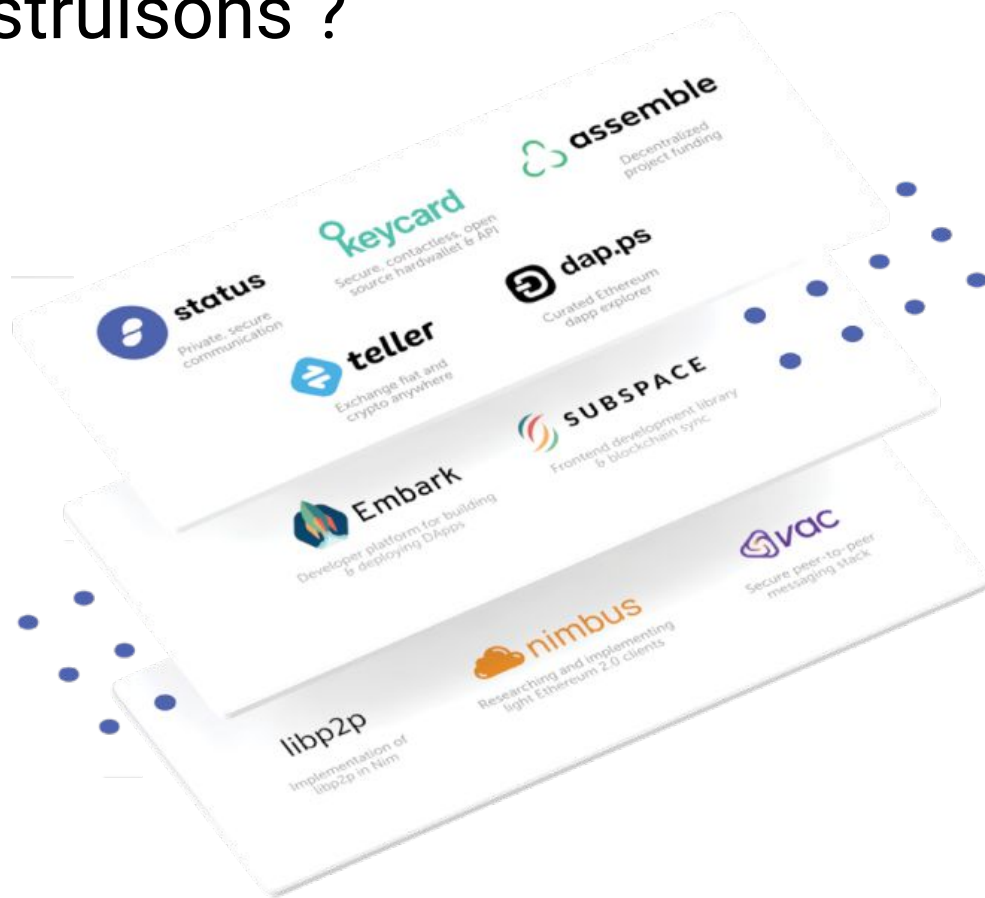

Des produits utilisables par des individus pour communiquer, faire des transactions et s'organiser

Outils

Pour permettre à d'autres de fabriquer des produits, en fait ici essentiellement des applications décentralisées.

Infrastructure

Des éléments de base des infrastructures blockchain

THE STATUS NETWORK		
PRINCIPLES		
SNT		
PRODUCT	DEV. TOOLS	INFRASTRUCTURE
STATUS	EMBARK	NIMBUS
KEYCARD	SUBSPACE	VAC
ASSEMBLE		LIBP2P
TELLER NETWORK		
DAP.PS		

I. Liberté

II. Résistance à la censure

III. Sécurité

IV. Respect de la vie privée

V. Transparence

VI. Ouverture

VII. Décentralisation

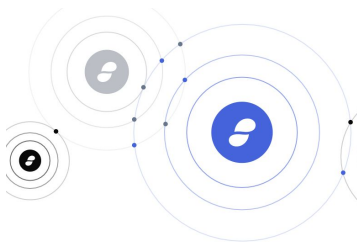

VIII. Inclusion

IX. Continuité

X. Inventivité

Le SNT est au coeur des projets Status

Network Incentivization

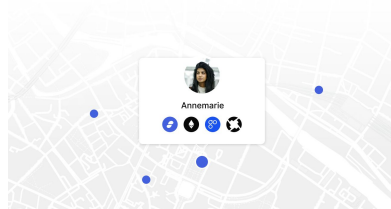

Sticker Market

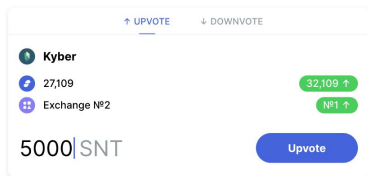

ENS Registration

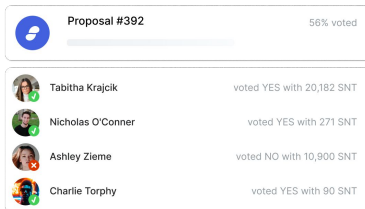

Teller Network

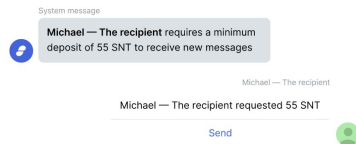

DApp Curation

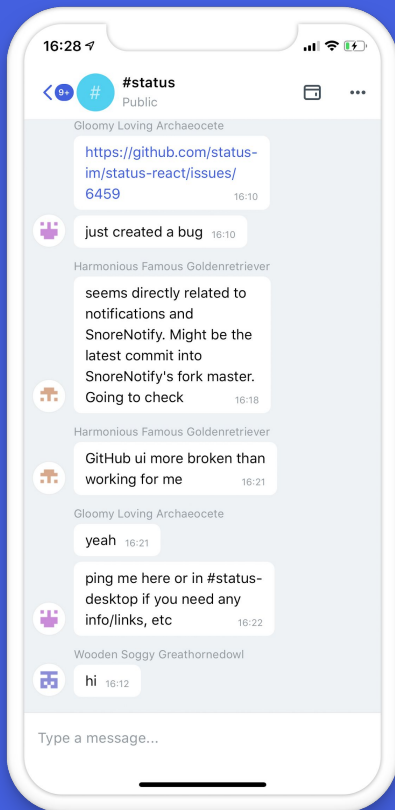

DAO & Governance

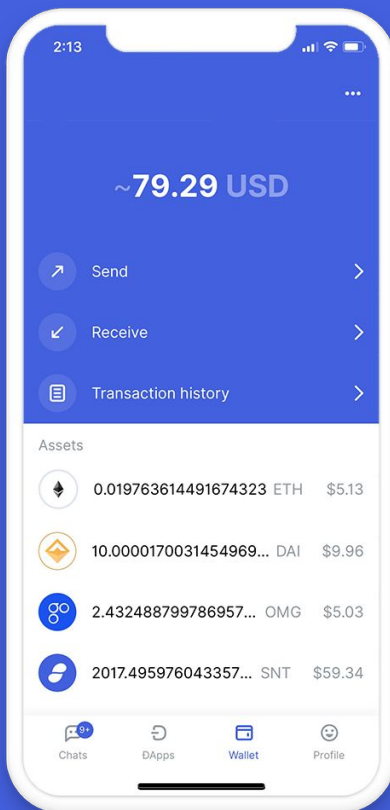

Tribute to Talk

keycard.status.im

Secure, Contactless, Open Source Hardwallet

Keycard is a new type of smartcard built with an **open API** for simple integration with crypto wallets and hardware.

Designed to safely send, store, and receive cryptocurrencies in a seamless contactless experience.

status

Private, secure
communication

Secure, contactless,
open source hardware
& API

assemble

Decentralized project
funding

teller

Exchange fiat and
crypto anywhere

dap.ps

Curated dapp
explorer

Embark

Developer platform
for building &
deploying dapps

SUBSPACE

Front-end
development library &
blockchain sync

nimbus

Light ETH2.0 client
written in Nim

Secure peer-to-peer
messaging stack

libp2p

Implementation of
libp2p in nim
